

VisualAPL for Visual Studio 2008: Install VS2008 First

Before attempting the installation of VisualAPL for Visual Studio 2008, first install Visual Studio 2008 SP1. If the VisualAPL for Visual Studio 2008 does not detect an installation of Visual Studio 2008, the following message box will be presented during the running of the VisualAPL for Visual Studio 2008 .msi-format installer.

After clicking the "Ok" button, the following dialog will be presented:

Click the "Close" button to end the aborted VisualAPL installation.
Install Microsoft Visual Studio 2008 SP1 before attempting the installation of VisualAPL again.
