VisualAPL Cielo Explorer – Modifying the Font Properties

To modify the font properties for the Cielo Explorer, use the Visual Studio "Tools > Options" menu item to display the following dialog. Be sure to set the "Show settings for:" list box to "[All Text Tool Windows]". The VisualAPL "APLNext" font can be selected in the "Font" list box and the font size can be selected in the "Size" combo box. Click the "OK" button to apply the font property modifications for the current and subsequent Visual Studio sessions.
